CAREER SUMMARY

MERCADO LIBRE
Full Stack developer | 10/2022 - Present

I`m currently working at this great company. I lead and serve as a reference in several projects, both on the backend and frontend. I participate in projects with a backend in Node.js with TypeScript and in Golang. Connecting projects to a Big Queue with more than 50k rpm news deliveries. We work with REST APIs and middleware. On the frontend, we build and maintain projects in React with TypeScript. In addition to working on the infrastructure and metrics of each project.

LA NACIÓN NEWSPAPER
Full Stack developer | 08/2016 - 10/2022

I had the great opportunity to work at this company and learn a lot. Here, I experienced significant professional growth. I started on the web layout and complex CSS3 effects team. Over time, I evolved to become a FullStack developer. I eventually led projects such as the new login and the paywall. I gained a lot of experience in team management and soft skills. Additionally, as it is a news outlet where SEO is important, we received thorough education on that front. The technologies used were React, Node.js, both with TypeScript, and some .NET.

IDFORYOU AGENCIA DIGITAL
Frontend developer | 01/2016/ - 08/2016

It was a short-lived experience because I was given the opportunity to migrate to a larger company. Here, I did responsive layout work and worked with WordPress. We used some libraries like Bootstrap, jQuery, and others.

LUCASDELGADO.DEV
Full Stack Product Developer | 2015 -

This was the beginning of my career, my own website where I sold digital products such as SEO, websites, design, digital marketing consulting, and more. During this stage, I was in charge of the entire project, including client communication, design, product development, programming, and more. It was a great and enriching experience.
